ELECTRIC VEHICLE EMERGENCY RESPONSE TRAINING

Prepare yourself for the future of transportation

This specialized training program is designed to empower First Responders to operate safely during emergency incidents involving hybrid electric, plug-in hybrid electric, and electric vehicles. Gain hands-on experience and confidence to approach, enter, and work around electric vehicles while understanding their unique characteristics, including high-voltage systems and potential

battery-related hazards. Learn essential procedures such as quick identification of an EV, locating power sources and safely disabling electrical systems to mitigate the risk of electric shock or fire. This comprehensive training equips First Responders with the knowledge and skills necessary to efficiently manage electric

vehicle incidents, ensuring a swift and safe response to protect both rescuers and those involved in the crash. Don't miss out on this opportunity to stay ahead in the evolving landscape of emergency response!
